# ONCO-IMAGING

**ONCO-IMAGING**  
UPDATE 2009

**INFOCUS DIAGNOSTICS**

**FOCUS on CARE**

Dear Colleagues,

On behalf of Team Infocus, it is my great honour & pleasure to welcome you to the **Onco Imaging Update 2009**, a one day **CME** at **J.B. Auditorium**, Ahmedabad on **Sunday, 29th of Nov 2009**.

We have attempted to include the most contemporarily significant & inspiring themes.

In recent years, strategic advances in Onco-Imaging have made significant progress in the management of various malignancies.

In an era where the lightening pace of technology and its successful applications have superceded a careful evaluation of its implications, we hope that through these stimulating lectures we shall be able to impart the necessary knowledge required to rethink, translate technology at its best to safe, effective & judicious clinical use & extend the marvels of the science across all barriers.

I am confident that, after attending the CME, you will go back home with a lot of new ideas & its implementation in day to day practice. The CME will surely impart prudent & relevant carry home messages for all of you.

We are looking forward to your visit & participation.

**Dr. Tushar Desai**  
Organising Chairman

## Programme Summary
